

Full Redis lifecycle ops are now at your fingertips for your on-prem, cloud and hybrid standalone or highly available Redis deployments with ClusterControl.

Versions: 6, 7

Redis on ClusterControl gives you

- Highly available Redis Sentinel clusters with automatic failover
- Key lifecycle ops features like add / remove / restart node, reboot host, etc.
- Observability into host and database specific metrics like commands/s and replica lag
- User access control via RBAC and LDAP and audit logging to track user authentications and activities

“ClusterControl enabled us to build automation around the platform for self-service provision while being able to determine the patterns of deployments consistently without DBA involvement.”

Kevin Naik, Head of Databases, ABSA
